

## Adult development and aging

MySearchLab provides students with a complete understanding of the research process so they can complete research projects confidently and efficiently. Students and instructors with an internet connection can visit [www.MySearchLab.com](http://www.MySearchLab.com) and receive immediate access to thousands of full articles from the EBSCO ContentSelect database. In addition, MySearchLab offers extensive content on the research process itself including tips on how to navigate and maximize time in the campus library, a step-by-step guide on writing a research paper, and instructions on how to finish an academic assignment with endnotes and bibliography. This comprehensive book helps readers process a clear picture of adult development and aging with the help and results of intensive scientific research. It challenges common stereotypes about this subject matter, and interprets the research data into an optimistic yet realistic appraisal of the many problems faced by the elderly in today's society. Chapter topics look at independence and intimacy in young adulthood; responsibility and failure in the middle years; the reintegration or despair of later life; research methodology; families; careers; personality development; learning and memory; intellectual and biological development; mental disorders; and death and bereavement. For individuals who want to view the potential richness of life at all stages, and/or understand the lives of older adults they may care for.
