

Fun & Easy Crafts For Everyone - Fun Crafts For All Ages: Creative Ideas And Crafts For The Whole Family!

Fun & Easy Crafts For Everyone - Fun Crafts For All Ages: Example text from the book: When selecting which photos to use for your scrapbooking project, it is greatest to pick photos of good quality. Consider choosing only photos that clearly illustrate the theme you desire for your album. Digital pictures, instant photos and even black and white photographs could be used. It is essential to be cautious that the chemical substances within the photos dont interfere with the rest of your scrapbook. Some chemical substances used in photos like lignin and acid in photo paper can lessen the preservation time of your scrapbook album. The safest pictures to use are digital photos basically since they could be easily printed out directly on lignin-free and acid-free paper. Keep in mind though that the pictures you choose to mount will become a permanent feature of your scrapbook. That is why it is greatest to use copies of your most cherished photos. Just scan each picture on a computer scanner and be sure to print each image on lignin-free and acid-free paper for the greatest results. To make your photos especially interesting, try utilizing a photo editing software program to alter the look of your photos. Make that color photo black and white or try sepia for that old-fashioned look. Cutting and cropping your pictures adds interest to your scrapbook pages and sends a special message to the viewer to take a closer look.

All in all, the way photographs are arranged and presented can improve the over-all look of your album and turn your project in to a professional-looking memory album.
