

Popular Mechanics Magazine, April 1953

THIS MONTHS COVER: HANG ON to your line---there goes Harris Ewald in his cabin cruiser! Fifty horses churn the craft through the water, for Ewald has come up with the novel idea of mounting two 25-horsepower outboard motors behind the 18-foot boat. Now he skims along Lake Michigan at 30 miles per hour to the throb of the twin putt-putts. Its all a part of a bigger story---the fact that cabin cruisers no longer are a novelty. Once too high-priced for the avrage men, cruisers now cost less than the family car and are owned by a lot of average men. The yacht-club set has changed in the past few years---its been invaded by these everyday sailors with their outboard motors. The broadbeamed outboard cruiser now reigns on rivers, lakes and oceans. Its not unusual for a family to take a 1500-mile voyage in a high-riding little craft. Youll find details of Ewalds cruiser on page 160, followed by a preview of some spanking new boats youll be seeing in near-by waters soon... [from the magazine]
