

How to Build a Home When Your Budget is Pennies! (How-Tos With a Budget of Pennies!)

This is a how-to book that I have filled with ideas and tips for someone to acquire the materials needed to build a home of their own. I discuss all of the materials that can be used and the average costs for each, as well as what other alternative or substitute materials that are available and how to use them. This book is for those who have some basic building and/or construction knowledge, a touch of ingenuity and are somewhat creative.
