

The Capitalist Space Economy (Routledge Library Editions: Economic Geography): Geographical Analysis after Ricardo, Marx and Sraffa

Representing an innovative approach to the analysis of the economic geography of capitalism, this stimulating book develops an analytical political economic framework. Part 1 provides an introductory overview of some of the fundamental debates about price, profits and value in economics which underlie the analytical political economy approach. Part 2 analyzes the special role of space and transportation in commodity production and the spatial organization of the economy that this implies. Parts 3 and 4 examine the conflicting goals and actions of different social classes and individuals and how these are complicated by space, concluding with a detailed analysis of capitalists' strategies as they cope with uncertainty and disequilibrium.
