

## Realizing Hope : Life Beyond Capitalism

What is the alternative to capitalist globalization? is a question challenging activists around the world. Michael Albert has wrestled with this question for many years, and his answer has captured the imagination of many. Participatory Economics--Parecon for short--is Alberts proposal for an economic system which offers a real alternative to capitalism, built on familiar values including solidarity, equity, diversity. In this ambitious new book, Albert goes further. Realizing Hope offers a vision of how whole areas of life might be transformed in a post-capitalist society, one where communities rather than profits are placed firmly at the center.
