

Macroeconomic Theory (Chinese Edition)

This book is oriented to economics and management major graduates. As a primary textbook for graduate macroeconomics, this book begins with undergraduate macroeconomics and the core content of undergraduate macroeconomics is summarized in the first two chapters. Then, most of the core themes about contemporary macroeconomics including rational expectations, intertemporal dynamic model, Endogenous growth and exogenous growth, non clearing market and imperfect competition, uncertainty and currency, are introduced in a concise and rigorous way. In the part of introducing the real business cycle theory and Dynamic stochastic general equilibrium model, growth and fluctuations, sticky wages and prices, consumption and investment, unemployment are integrated together. In addition, combining theory with policy, government policy, the stability and dependability of policy, the relationship between policy and macroeconomics are also discussed in this book.
