

## What Is in a Rim?: Critical Perspectives on the Pacific Region Idea (Pacific Formations: Global Relations in Asian and Pacific Perspectives)

This pathbreaking, multidisciplinary work challenges our unthinking acceptance of such terms as Asia Pacific and Pacific Rim. Clarifying the hidden power relationships and hegemonic struggles that are disguised by ideological constructions of the region, the contributors uncover fundamental contradictions—including the human costs and consequences—that underlie the much-celebrated economic boom. In evaluating the idea of Asia Pacific, the book shifts our focus from abstract relationships between capital and commodities to the human interactions that have played a formative part in the regions constitution. The contributors agree that it is these interactions that constitute the region, rather than the physical boundaries of the Pacific. This revised and updated edition brings in additional essays focusing on conceptualizations of the Pacific, considers more fully interactions among countries, and strongly emphasizes peoples within the Pacific, who are routinely ignored in most discussions of the Rim.
