

Desirable Researcher Characteristics Development

It is really important to develop learners to have knowledge about research processes and to have the characteristics of being a desired researcher. This book has been written on my research project that was promoted by Thailand Research Fund and Office of Higher Education Commission. I would like to thank you everybody that involved my research project and my book. Especially my students who have driven me for developing my teaching method. I hope my book will be useful for the man who is interested in it.
