

Foreign Direct Investments in Asia (Routledge Studies in the Modern World Economy)

This book covers nine countries of ASEAN and the East Asian area, including major Asian countries, and compares their respective policies to attract Foreign Direct Investments (FDI). Through comparative study of FDI promotion policies, this book will give policy makers in the area of FDI promotion an overview and comparison of the FDI policies of other countries. In addition, researchers at graduate, post-graduate or professional level will gain from the econometric methodology and detailed definitions of various spillover effects (horizontal and vertical), which will be beneficial to their research. In addition to FDI policy comparison, this book focuses on the various spillover effects of FDI. It separates it into categories: own productivity effects; intra-industry spillover effects; and inter-industry spillover effects (forward and backward linkage effects). While most other studies have only taken econometric tests on own-productivity and intra-industry spillovers, a key advantage to this book is that it also covers the separate effects of inter-industry linkages. Through policy comparison and econometric tests on various spillover effects on economic growth, employment and exports, this book will give policy makers and researchers an innovative and constructive guide to FDI.
