

Civil Society in Central and Eastern Europe (Changing Europe) (Volume 7)

Utilizing a wide range of empirical cases, the contributions in this volume highlight the different aspects of the role, development, and societal background of civil society in Central and Eastern Europe. The first part of the book deals with dissent under socialism. The second part of the book looks at the role of civil society in the Western Balkans in the context of the breakup of the former Yugoslavia and the related ethnic conflicts. The third part examines the role of civil society in the post-Soviet region, which is marked by authoritarian tendencies. The fourth part returns to Central Eastern Europe with an analysis of the impact of EU accession on the role of civil society and considers the underlying aspects of a common European memory. The final section of the book looks at two cases—one from Central Eastern Europe, one from the CIS region—of political participation and lobbying by civil society organizations.
