

# Liftoff: Careers in Satellite, the Worlds First and Most Successful Space Industry

There is a lot of talk these days about the space business. It may be about new and cheaper ways to launch rockets. Or maybe its about space planes like SpaceshipOne, spaceports being built in the desert, or space tourism and space hotels. Its all good stuff. But when it comes to real business in space, there is only one: the satellite business. Its the only one that makes money today and has been making money for decades. If the satellite business sounds like an interesting place to start a career, youre in the right place. In the pages of Liftoff, you can learn about the industry, the kind of careers it offers, the qualifications they require, and the best ways to get a career started.
