

The reality of the supernatural

For ages, people have been interested in the supernatural. Investigators and science researchers have written many books on the subject. The reality of the supernatural explains phenomena in a new light. Ghost sightings, poltergeists, angels, demons, the old hag syndrome and life after death are just some of the true personal accounts in these pages. Scientific research along with two thousand year old bible references mentioned to support some of these occurrences. Truly scary! A book definitely for believers and skeptics!
