

How to Make Money - Revisited

How to Make Money was originally published during the Roaring Twenties, yet contains timeless secrets of financial security, personal development and motivation that were sorely lacking by the end of that decade. {Precious few original copies are believed to have survived the Great Depression.} The prescriptions of this text were prophetic medicine, foreshadowing the economic collapse of 1929, and the -Revisited version adds content designed to make it more relevant to the present day. Expanded bonus-material includes resources for increasing your influence with social media, recommended podcasts/blogs, a reading list of books to jump-start your business development, and some creative business ideas to stimulate the Inner Entrepreneur, requiring little or no capital to launch. Sample Quotes: The only things that matter are these: You must get it out of your head that you are not capable of doing big things. You must realize that the reason youre not doing big things is that you have never had an opportunity to learn. Every successful person in the world today thought just the same things which you were thinking at sometime in their lives. They had to learn how, too. You must grit your teeth and start. Close your eyes to everything but success. The most difficult thing about being successful is making up your mind that you are going to succeed. Once you overcome that fear which haunts you, which holds you back, you will become master of yourself and the whole world cant stop you. Dont let timidity, fear, self-consciousness, or what others think rule you. You know you are capable. Surely you believe in yourself, so close your eyes to those petty obstacles and work for your own future instead of to please your present associates. Here is the plan that will give you your start, successful career. Read it. The first step is to read every single word in this book, and

then just decide which plan you will select.

Dont just read. Think while you read!
Forget every single thing in this world but your future. Commissioned sales is probably the greatest equalizer of income. With targeted training and education, a sales career can produce more financial leverage than any other endeavor. Best of all, selling is a skill; not a gift. A simple practice that sets a professional apart, is that she believes her work is noble in purpose. When you enter a sales position with this philosophy, you will craft deals that are win / win. Owning a business will always offer greater opportunity, more flexibility, and richer rewards in the end; if you are willing to make the sacrifice. The only thing that makes sacrifice enjoyable is love. If you love what youre doing, you can suffer through the initial learning curve and eventually enjoy the fruit of your labor. Being creative and having a well thought-out plan doesnt mean anything until theres a beta version or a working model. Dont let your ideas die on the drawing board.
